CHAPTER TITLE

Excel Basics: Cleaning & Combining Data

VIDEO TITLE

Combining Data From Two Tables (INDEX-MATCH)

- 1 INDEX() and MATCH() are two **powerful** Excel functions that are often used together to search for and retrieve data from a table or range.
- 2 The syntax of the INDEX() function is: INDEX(array, row_num, [column_num]).
- 3 The syntax of the MATCH() function is: MATCH(lookup_value, lookup_array, [match_type]).
